CUSTOM DOORS

Karmanah

Since 2009 Karmanah Wood Design has established its reputation building high-quality doors for homes and businesses on Vancouver Island and beyond.

With more than forty years of combined experience, our joiners are continually pushing the boundaries of door design and innovation while carrying forward a commitment to the time-honored joinery techniques that make our doors last.

Built from sustainably harvested lumber, we make beautiful doors that bring elegance, harmony, and meaning to your home.

PIVOT DOORS

A sleek and contemporary alternative to traditional hinges, pivot systems rotate on the floor and top jamb. This design can handle the weight of impressively large sizes and the nearly invisible hardware makes for surprisingly easy and smooth operation.

FOLDING DOORS

With individual doors measuring up to four feet and combinations reaching spans of up to 24 feet, folding doors creatively unify indoor and outdoor spaces when open and beautifully frame dramatic vistas when closed. Smartly designed Eclipse Architectural® hardware is nearly invisible and makes operation seamless and smooth.

INTERIOR DOORS

Beautifully designed and expertly crafted interior doors are durable and completely customizable. There are endless possibilities, from live edge barn-hung doors to solid wood pocket doors or standard hinge-hung doors. We will work with you to design the best possible interior door for each room in your home or business.

FRENCH DOORS

Bring light and colour throughout your home with the sophisticated look of French doors. These interior doors are the elegant way to divide living spaces and can be hung in a variety of configurations, including traditional hinging, sliding, and even as barn doors. Unify entryways throughout your home with the timeless look of our completely customizable French doors in bedrooms, bathrooms, office, den, pantry and more.

MATERIAL OPTIONS

Ethical Timber

By sourcing materials responsibly and using naturally fallen or reclaimed timber whenever possible we use only what the environment can provide sustainably. Forest resources need to grow and thrive for future generations and we're doing our part to make that a reality. All our products are crafted from hand-selected, superior quality wood species such as Douglas fir, cedar, maple, black walnut, white oak, ash, and more.

Glass + Metal

The inclusion of metal inlay and glass components offers richer material contrasts highlighting the natural characteristics of the wood grain and colour. We use only high-performance energy conserving glass components. Glass thicknesses can be customized to suit your specific environment and energy requirements. From frigid mountaintops to harsh coastal environments, or even arid desert plains, our doors are built to withstand tough elements and last for generations.

Stain + Paint

Our stain-grade doors and furniture can be finished in a broad range of stain colours and finishes, and paint-grade doors can be ordered in any colour imaginable.
